

Our friendly team will work with you to ensure that you get the right style of roof for your building and use.

Smart Asbestos provide various roofing options to replace your old asbestos roof. By fitting new sheets, you are totally refreshing the garage , giving it a longer lifespan and it's a more cost-effective option than replacing the whole building.

Our brochure shows the most popular style and colour options for replacement roofs. We replace Apex Roofing as well as Flat style roofs. We are flexible so if there is a material type which is not shown then please tell us about this and we are more than happy to consider the options with you

Styles and Colour Options

Box Profile Sheetting

Our most popular product is the Box Profile sheeting for garage roof replacements.

For a Smooth Finish :

Material : Polyester Smooth Painted Finish

Galvanised Steel with a polyester smooth painted finish. This type of sheet has a life expectancy of 25 years and a moderate resistance to scratching.

Textured Finish (most popular)

Material : PVC Plastisol / Plastic Vinyl Coated

Galvanized steel with a Plastic Vinyl Coating. Lightly textured surface , similar to leather grain. High Resistance to scratching and damage with a life expectancy of 30 years in normal environments.

Colour Options: All colours on Colour Chart

Anti-Condensation Backing available : Yes

Tile Effect Sheetting
